JULY 2024 | UTERINE FIBROIDS & FERTILITY

# 80% of Women Develop Uterine Fibroids by the Age of 50

We understand the importance of addressing issues like fibroids when planning for a family, which is why we offer Kindbody—your fertility and family building benefit—to help navigate the path to parenthood. Whether you're just starting to explore fertility options or seeking guidance on managing fibroids, Kindbody's team of experts is here to support you every step of the way.

Your Kindbody benefits provide you and/or your partner with:

- Fertility services including IVF, egg freezing, and more
- A world-class team of fertility experts and clinicians
- Fertility clinics located across the country
- Clinical consultations: either in-person or virtual
- 24/7 chat access to have your questions answered

## Fibroids can affect fertility in multiple ways.

*These factors can make it challenging for women to conceive or carry a pregnancy to term.*

**Distorting  
the shape of  
the uterus**

**Blocking  
fallopian  
tubes**

**Interfering with  
blood flow to  
the uterine lining**
